than satisfy our discerning
clients

Reclamation Services - Fine Details

Reclaim

It is quite a daunting task to take a restoration project from start to finish. We find that clients often lack the confidence to contract a series of tradesmen at the various stages. We take the worry out of your investment in a period feature.

In the first instance we source a wide range of architectural salvage hand picked by our experts that would form the basis of your project. It is our belief that these beautiful yet forlorn pieces should be treated with the upmost respect right from the start.

Restore

Over years of experience, having built up knowledge of restoration techniques and applying a secret recipe of finishes ensures that we correctly and patiently rejuvenate these pieces and bring back the former glory of their youth.

Whether we painstakingly hand paint panels to match antique stained glass, hand carve wooden mantels, sand and polish intricate parquet flooring or colour match to perfect your restored Georgian town house door we always use tried and tested traditional methods.

Re-use

We don't stop at restoration as we believe in providing you with a complete service.

This can include on site fitting of doors and frames, installation of fireplaces and laying of flooring.

Which all means that the worry is taken out of your project from start to finish, from reclaim to re-use.

With over 1000 doors in stock ranging from 18th C country cottage to Victorian, **Hundreds of Antique Fireplaces** and Fire Surrounds, **Miles of Wood Flooring** in select timbers and **Stunning Stained Glass** we have a comprehensive collection to help you complete your restoration project. Call us on 01730 231995 to arrange an appointment or visit our web site at www.arcreclamation.com for further details.
